Three Mobile Protect

Don't fall victim to cyber crime

In today's world of the anywhere workplace, many employees are using public or unsecured Wi-Fi to access company data. Cyber attacks, phishing and malware are becoming ever more prevalent, and mobile users are especially vulnerable.

Safer, smarter mobile security

Three Mobile Protect delivers advanced protection for mobile users from cyberattacks, phishing and malware. Here's how we can protect your business.

Quick to deploy, flexible and scalable, it prevents threats with unique mobile endpoint security which is more powerful, more respectful of employee privacy and easier to deploy than other solutions. Our pioneering on-device protection is transforming the way organisations secure their employees' phones and tablets.

83%

of all UK security breaches experienced by businesses last year started with a phishing attack.
(UK Gov Cyber Security Breaches survey 2022)

48%

The UK businesses experienced at least one cyber attack.
(UK Gov Cyber Security Breaches survey 2023)

Benefits of Three Mobile Protect

Simplicity

No management or admin. Just a simple, one-time set up for iOS and Android.

Detect & disable mobile threats

Prevents phishing attacks, malware, and data loss on all company devices.

Prioritising Privacy

Highlights potential attacks without encroaching on employees' personal data or privacy.

Find out more about our partner, Corrata Ltd

Three Mobile Protect is powered by cyber security specialists Corrata, global leaders in mobile security. They work with leading businesses around the world to provide simple, complete protection against phishing malware, man-in-the-middle attacks and data loss on company devices. Their technology is unique, and Three is the first mobile operator to offer it to UK customers. Their expertise will support Three Mobile Protect customers to get up and running seamlessly, and they will be on hand to step in if technical support is needed.
